

YOUR TRUSTED PARTNER IN PUMP SOLUTIONS

Since 1995, Liquiteck has been delivering comprehensive pump services, including distribution, repair, maintenance, and installation, even for discontinued models. Serving sectors such as commercial, municipal, mining, chemical, and food & beverage, we ensure reliable performance for diverse applications.

With unparalleled expertise and partnerships with leading manufacturers, we provide trusted solutions that meet the needs of major companies and municipalities across Canada. Choose Liquiteck for dependable, high-performance pump solutions.

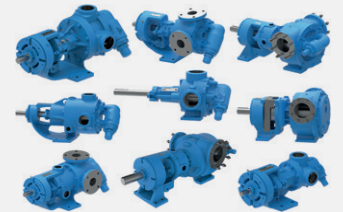

- Founded in 1948 and building pumps for over 155 years
- Chemical processing, medium to extra heavy duty and severe duty
- Slurry pumps, paper stock, vertical turbines, axial flow
- Submersible pumps, high pressure multi-stage, double suction
- Solids handling pumps and magnetically driven pumps
- DI, SS, CD4MCu, titanium, alloy 20, monel, nickel and more
- Leads industry in mechanical design and adoption of smart technologies
- The only manufacturer to make digital monitoring standard on all pumps

- Water application pumps
- End suction centrifugal, vertical multi-stage and in-line pumps
- In-line, low head, self-priming, gasoline engine driven
- High pressure multi-stage booster pumps
- Closed coupled or frame mounted models available
- Stainless steel, cast iron, bronze and more
- Aquavar, AquaStart, Hydrovar, AquaForce variable speed drives
- Diaphragm tanks

- Internal and external gear pumps
- Asphalt, mining, hygienic and positive displacement pumps
- Solvent to caulking, cryogenic to molten, newtonian to non-newt, lubricating to non-lubricating, acidic to alkaline, abrasive, low to high vapor pressure, edible to toxic
- ABEL reciprocating positive displacement diaphragm pumps for solids and high pressure plunger design, aggressive, abrasive, and shear sensitive media.

- Engineered systems for service in harsh conditions in all industries
- End suction, split case, vertical turbines, in line and jockey pumps
- Operated with diesel engines or electric motors
- Control panels, fully integrated to monitor all systems on schedule
- UL listed FM approved. Conforming to NFPA guidelines
- Variety of materials available like 316, super duplex and others
- Pre-wired and pre-piped
- Skid packages

- Air operated double diaphragm pumps (AODD)
- Electrically operated diaphragm pumps (EODD)
- Metallic and non-metallic options available
- Heavy duty and high pressure applications
- Oil and gas, submersible and food grade applications
- Containment duty
- Ball and flap duty valves
- Leak detection

- Leader in precision triplex reciprocating pumps and systems
- High pressure plunger and piston pumps
- Custom-engineered pumping systems
- Reverse osmosis and water treatment
- Food, beverage, and pharmaceutical
- Commercial and industrial cleaning
- Misting, cooling and fogging
- Oil and gas applications

- Leading-edge hydraulic engineering for high performing pumps
- Standard centrifugal, solids handling and clear liquids
- Vacuum-assisted and self-priming pumps
- Sound-attenuated diesel-driven pump packages
- ElectricPAK modular design pump skids
- Integrated and standalone ElectricPAK VFD's
- Agricultural, mining, municipal, oil and gas application
- Open diesel pump packages

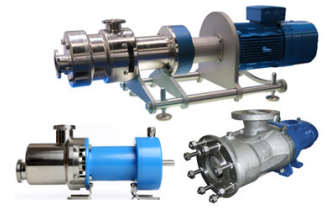

- Water Systems for residential and commercial applications
- Submersible well pumps, motors and control boxes
- Vertical lineshaft and submersible turbine pumps
- Jet, centrifugal, self-priming, multistage pumps and packages
- Multiple drive configurations such as gas driven, close-coupled, frame-mounted, hydraulic driven and SAE
- Sewage, effluent and grinder pump packages
- Drives, VFD's, starters and protection device

- Heavy duty slurry pumps up to 1,000HP - 10,000GPM
- Submersible Pumps: Run dry capable, Class 1 to Class 3 solids handling from 2% to 70%
- Wide range of dewatering, agitator and slurry pumps
- Horizontal Pumps HNH Series: HNH Series offers 3 wet-end designs and multiple seal options
- Cantilever Vertical Pumps: Heavy duty bearing and oversized shaft. Many metallurgies available

- Positive displacement, viscous, solid in suspension, variable speed
- Capable of vacuum, reversible, heat jacketed, shear sensitive, concentric twin screw design. Low-no pulsations, low noise level
- Can be dry run with proper mechanical seals, no contact, compact design, high delta P, self priming, ATEX compliant, constant flows
- Chemicals, food & pharmaceutical, oil & gas, bitumen, tar, light and heavy fuel oil, crude oil, mazut, polymers, paint, slurry, pastes, liquid sulfur and multiphase mixture

- OEM Manufacturer and repair center of mechanical seals
- Lube oil systems and grease lubrication systems
- ANSI seals / API seals / slurry pump seals / gas barrier seals
- Split cartridge seals / single-dual seals / multi-lip cartridge seals
- Edge welded metal bellows for 800F and cryogenic / vacuum applications
- Barrier fluid reservoirs / filtration systems / heat exchangers
- Infrared thermography and ultrasound services

AUTHORIZED SERVICE AND REPAIR CENTER

- On-site repairs
- In-house repairs
- Pump installations
- Start-up assistance
- On-site troubleshooting

- Laser alignments
- Dynamic balancing
- Certified expert technicians
- Hydrostatic pressure testing
- Vibration analysis category II

- Installation investigation
- Machining of custom parts
- Complete pump refurbishing
- Repair of submersible pumps
- Repair of obsolete pump models
